

J'can Born Pilot, named 2012 National Geographic Emerging Explorer

A cyborg anthropologist, a pilot, a digital storyteller and zoologist, a crisis mapper and a guerrilla geographer are among the 15 visionary, young trailblazers from around the world who have been named to the 2012 class of National Geographic Emerging Explorers.

National Geographic's Emerging Explorers Program recognizes and supports uniquely gifted and inspiring adventurers, scientists and storytellers, who are pushing the boundaries of discovery, adventure and global problem-solving while still early in their careers.

The Emerging Explorers each receive a \$10,000 award to assist with research and to aid further exploration. The program is made possible in part by the Panasonic Corporation.

The 2012 Emerging Explorers are U.S. cyborg anthropologist Amber Case; U.K. digital storyteller and zoologist Lucy Cooke; U.K. behavioral ecologist Iain Couzin; Mexican underwater archaeologist Guillermo de Anda; chemist Yu-Guo Guo of China; conservationist Osvel Hinojosa Huerta of Mexico; U.S. pilot and educator Barrington Irving; conservation biologist Krithi Karanth of India; Swiss crisis mapper Patrick Meier; U.S. archaeologist Sarah Parcak; U.S. data scientist Jake Porway; U.K. guerrilla geographer Daniel Raven-Ellison; U.S. archaeologist Jeffrey Rose; engineer and renewable energy advocate Ibrahim Togola of Mali; and archaeologist Daniel Torres Etayo of Cuba.

The new Emerging Explorers are introduced in the June 2012 issue of National Geographic magazine, and comprehensive profiles can be found at <http://www.nationalgeographic.com/explorers/grants-programs/emerging-explorers/>.

National Geographic Emerging Explorers may be selected from virtually any field, from the Society's traditional arenas of anthropology, archaeology, photography, space exploration, earth sciences, mountaineering and cartography to the worlds of technology, music and filmmaking.

"National Geographic's mission is to inspire people to care about the planet, and our Emerging Explorers are outstanding young leaders whose endeavors further this mission. We are pleased to support them as they set out on promising careers. They are innovators in their respective fields and represent tomorrow's Edmund Hillarys, Jacques Cousteaus and Dian Fosseys," said Terry Garcia, National Geographic's executive vice president for Mission Programs.
